LUCCA BARROSO

Web developer

Hello, my name is Lucca, I'm a front-end developer with solid experience and about to complete my degree in Computer Science. Throughout my academic and professional journey, I've explored various technologies, including Vue, Nuxt, WordPress, and Laravel, thereby enriching my skill set.

Additionally, I have a significant interest in the design, having completed a variety of courses, ranging from UI/UX to layout design. I've always appreciated the harmony between creativity and functionality in development. This combination of skills enables me not only to create efficient technological solutions but also to provide visually appealing experiences for users.

Even tho my expertise is focused on the front-end, my goal is to expand my knowledge into the full-stack realm. I am willing to step out of my comfort zone and embrace opportunities that allow me to deepen my understanding of the back-end and develop comprehensive solutions.

If you are in search of a dedicated developer, ready to tackle new challenges, consistently grow, and bring a user-centric design approach, I am eager to discuss how I can add value to your team.
